

June 2006 - Catalyst enters into a maintenance and support agreement in support of Podiatry Associates' Scheduling Application.

This application was developed and deployed to their Columbia, Franklyn Square and Greater Baltimore Medical Center locations by Catalyst in December 2005. Support terms include defined service levels with expected response times for both standard and urgent requests, and allowed Podiatry Associates to provide support domestically to end-users of this critical business process automation application.

About Podiatry Associates:

Podiatry Associates, P.A. (www.podiatryassociates.org), one of the largest standalone podiatry practices in the United States, has been providing high quality medical and surgical treatment for disorders, conditions and injuries affecting the foot and ankle in the Baltimore area since 1965. All of their doctors are either Board Certified or Board Qualified by the American Board of Podiatric Surgery.
